JÄRNHÄSTEN ESSENCE

REMOTE-CONTROLLED • HYDROSTATIC OPERATION • DYNAMIC ADJUSTABLE CHASSIS

A completely new generation of machines

With the Essence model, we're taking it a step further than ever before. This model is based on the track system of the Flex models but is otherwise a completely new design and development, which through its remote controller, hydrostatic operation and its dynamic movable chassis, provides completely new and unique features to the IronHorse model range.

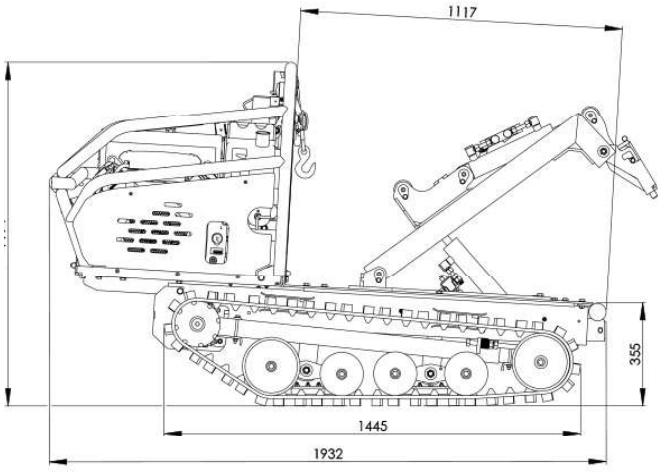

For whom?

The IronHorse Essence is the model for contractors or forest owners who want the ability to remotely control various hydraulic tools and accessories. It may be due to safety concerns, or simply for ease of operation in difficult or sensitive terrain. Other examples of users are arborists and emergency services. The universal tool-mount helps you gain access to a wide range of accessories offered from certain producers of compact-loaders. Customizations are also a possibility - please speak to one of our represents for more information.

FUNCTIONS

- **Remote-Controlled**
  Operate the machine and all its features via the Radio-Controller for safe and easy operation
- **Hydrostatic operation**
  Very smooth and powerful hy-drostat drive for precise operation.
- **Movable chassis**
  The entire chassis can be moved hydraulically while driving for improved off-road performance
- **High performance work-hydraulics**
  Both low and high flow outlets

Tracks:	Internal Drive, Rubber
Hydraulic-Winch:	900kg traction force, 6 mm, 20 m

ACCESSORIES TO ESSENCE

Many of the existing accessories in our product range fit the Essence-model and with the hydraulic lift and its universal tool-mount you can connect a wide variety of different tools and accessories such as snow blade remover, snow blower, arborist grapple, or a fork-lift just to mention a few. With the dumper body you can make the machine to an efficient and flexible loading machine. The basic loading-platform of the Essennce is designed to be easily adaptable for your own needs, ideas and accessories and thus giving you tons of possibilities for various applications.
