JÄRNHÄSTEN FLEX 2

REMOTE-CONTROLLED HYDRAULIC WINCH • BETTER BALANCE • IMPROVED DESIGN

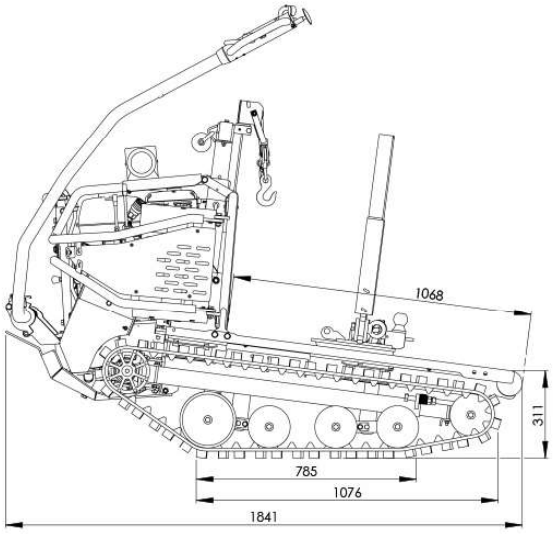

Multiple improvements
A further development of the Flex model with many technical improvements and new features such as remote-controlled hydraulic winch, improved balance and electric anchor winch.

For whom?
The IronHorse Flex 2 is a model suitable for most users, and comes fully equipped for timber handling and forestry and is therefore clearly suitable for both the self-employed forest owner and the entrepreneur who wants a professional and versatile machine. Both hunters and firefighters especially appreciate the possibilities with light packages and the increased space for equipment.

FUNCTIONS

- **New design**
  Opening guard for easier access for service and maintenance
- **Remote controlled hydraulic winch**
  Unique decouplable, remote controlled hydraulic winch.
- **Balanced chassis**
  Increased weight at the rear for better balance when driving without load
- **Lighting package (optional) and electric winch**
  Front and rear lighting (optional) and electric anchor winch with “Dyneema” rope
